Tubing & Casing

We would call the particular attention of deal-m and producers to this make of Tubing and Jacing. One of the important features in the namufacture of our Tubing is, that the

Lap and the Weld

are made perfectly straight, smooth and uniform, thereby giving equal and great strength to the tubing throughout.

Hach joint carefully tappested, reamed at end, and proved with the sockets on at a hydraulic presence of 1,200 pounds to the square inch before

Oil Well Tubing.

This Superior Tubing is furnished with heavy sockets, and is out with a vanishing screw thread, socresponding exactly with the thread in the socket, so that when screwed up it has a bearing the whole length of the joint; and the absence of a deep thread on the tube at the sud of the socket obviates the liability to break at that point from the vibration caused by the setton of the pump.

Such length and socket is stamped with our trade mork, and is carefully tested before shipment with a hydraulic pressure of 1,200 pounds to the square limb.

While here he formed the acquaintance of a young man in a store on Farnham street, and as both spoke German well, they passed many a pleasant hour in one another's company. One day last Saptombor he astonished his friend by appearing before him in the garb of a fashiouable young man of the town, and with planty of money, entered upon a career of dissippation that soon reduced him to comparative penucy again. He then announced that he was going amon to the town, and with planty of money, entered upon a career of dissippation that soon reduced him to comparative penucy again. He then announced that he was going to hand at lenst \$25,000 in all, will probably assigned by General Crock to the charge at mone an other two, and then returned, having walked the entire distance from that place to this. He was ragged and foct-sore, and his friend could hardly believe that it was the same man who, a short time before, had paraded the atreets in such elegant costume. He was, however, cured for by the friend, and soon after got a place so a saloon clerk in a lager beer place on Farnham street between Tonth and Eleven. Explanation of Cats. No. 1Represents the Joint Compiete. No. 2A longitudinal sectional view of a fult Joint, showing the position of the wood in the socket when wedged, a glance at which must convince the most skeptical of the superiority of this Joint over any other. No. 3A view of the end of the Rod, when turned ready for the socket to be driven on, with the slot for the wedge and the wedge about being entered. No. 4Represents the end of the wood, and shows the proper way to saw the slot (across the grain) into which the wedge is to be driven. The above description and accompanying cuts will enable any skilled person to make connection at the wells in a much shorter time than can be done with any other Rod all the tools required being a small fine saw.
